

Thin Layer Chromatography is a tried and tested technique, which is still widely used in a wide range of applications in the pharmaceutical, cosmetics, food, chemical industries, and its ease of use and speed make it THE solution for analysing samples.

With the Biostep range of HPTLC equipments, laboratories can now work safely in an automated way, in compliance with Good Laboratory Practice.

APPLICATION

*Modular Full-Automated
HPTLC Sample Applicator*

DERIVATIZATION

*Multi-Reagents
Derivatizer*

DOCUMENTATION

*Multi-Wavelength
Documentation System*

QUANTIFICATION

HPTLC Scanning Densitometer
